**Experience in  
product development**  
for the mining and construction industries

---

## LEARN MORE ABOUT US

---

Leader in the manufacture of GET buckets, and attachments. Headquartered in Miami and with a global presence, PETRAX has more than 30 years of experience developing quality products in the mining and construction sector.

PETRAX is recognized in the market both for the quality of its products and for its A1 service. PETRAX works hand in hand with spare parts distributors, as well as machinery distributors, respecting OEM configurations and providing its know-how to improve operational performance.

## GLOBAL PRESENCE

---

With a global presence, PETRAX operates from its central warehouse in Miami and maintains a direct connection to its factory in China. In addition, it manages exclusive distributors in each country, thus maintaining the integrity of the supply chain.

This robust infrastructure allows us to carry out detailed monitoring in all phases of the process, both in production and logistics, which ensures the quality of PETRAX products.

## OUR VISION

---

To be recognized as world leaders in the cutting tools sector, standing out for our impeccable reputation and the excellence of our products.

We strive to remain at the forefront of the latest technology, always offering products of the highest quality in offering the highest quality products for the public works and mining machinery sectors.

## OUR SERVICES

---

Our trained and experienced technical support team provides personalized assistance to our customers. We are committed to ensuring quality at every stage of your project, from acquisition to operation.

## OUR PRODUCTS

---

PETRAX is committed to total quality. We carry out thorough supervision in all production processes to ensure that our products meet the highest quality standards. This guarantees the satisfaction and confidence of our customers with every purchase.

## OUR ADDED VALUE

PETRAX offers added value by designing and producing exclusive accessories for the industry, closely supervising all manufacturing processes. In addition, we provide expert advice and support, ensuring our clients receive comprehensive quality assurance.

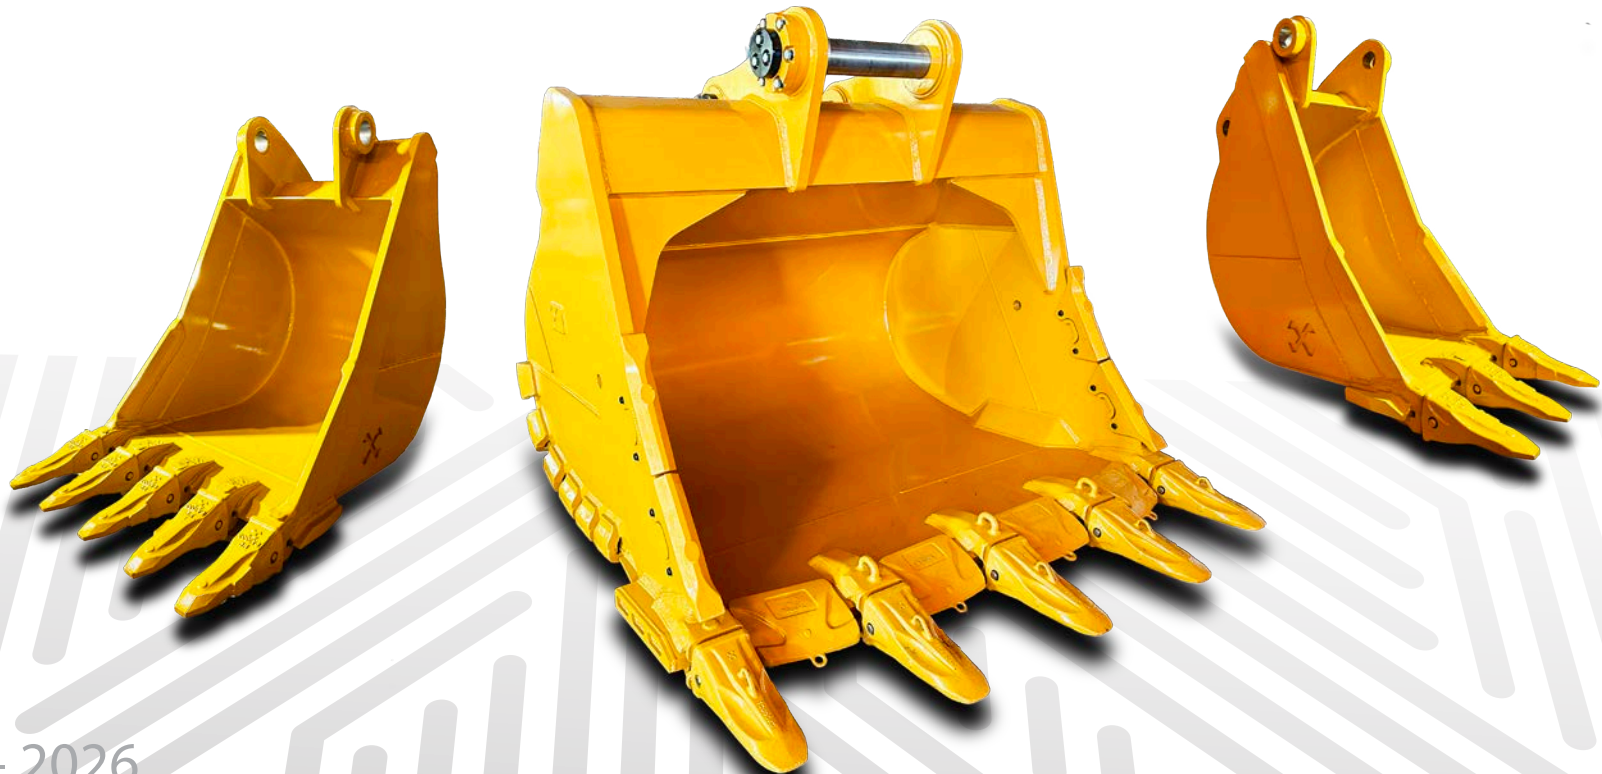

## **PETRAX BUCKETS – PERFORMANCE ENGINEERED FOR YOUR HEAVY EQUIPMENT**

At PETRAX, we specialize in wear solutions and high-performance bucket manufacturing for all types of heavy equipment: backhoe loaders, excavators, motor graders, and front loaders.

Our buckets are designed and built to OEM specifications, ensuring durability, precision, and long service life—even under the most demanding conditions.

Whether you're working in mining, earthmoving, road construction, or urban development, PETRAX buckets deliver the power, versatility, and efficiency your machinery needs to perform at its best.

## **PETRAX BORON BLADES – EXTREME DURABILITY FOR HEAVY-DUTY MACHINERY**

At PETRAX, we manufacture high-performance boron blades specially designed for motor graders, wheel loaders, and tractors, offering exceptional wear resistance and extended service life.

Engineered under strict OEM specifications, our boron blades combine hardness, precision, and adaptability to withstand tough terrain and long working hours without compromising the efficiency of your equipment.

Whether for roadwork, mining, agriculture, or industrial applications, PETRAX blades ensure reliable performance, increased productivity, and reduced maintenance downtime.

## PETRAX WEAR PARTS – PERFORMANCE THAT MAKES THE DIFFERENCE

At PETRAX, we design and manufacture a complete line of TC teeth, bucket reinforcements, and wear components engineered to deliver maximum reliability, productivity, and operational efficiency in mining, construction, and earthmoving sectors.

Our products are built under strict OEM specifications, using advanced metallurgical engineering to ensure high wear resistance, reduced replacement cycles, and safe performance in every operation.

## PETRAX CUTTING TOOLS – TAILORED SOLUTIONS FOR EVERY GROUND CONDITION

At PETRAX, we design and manufacture high-performance cutting tools for demanding applications such as bridge construction, trenching, subsurface drilling, road building, deep foundations, diaphragm walls, and structural reinforcement.

Our tools are engineered to perform in a wide range of ground conditions—from sandy and cohesive soils to soft and hard rock. Backed by advanced metallurgy and rigorous quality control, PETRAX products are manufactured to the highest standards using premium materials and precise production processes.

Exclusive solutions with specialized technical advice
